85% 被检测为由 AI 生成

该百分比表示可能是由 AI 生成的文本以及可能是由 AI 生成且经过 AI 改写的文本的总量。

注意 需进行审核。

在对学生作业做出评判之前 了解 AI 检测的局限性至关重要。我们鼓励您在使用该工具之前 先详细了解 Turnitin 的 AI 检测功能。

检测分组

-  **1 纯 AI 生成文本 85%**
可能来自大型语言模型的 AI 生成文本。
-  **0 经 AI 改写的 AI 生成文本 0%**
可能是使用 AI 改写工具或词语微调器修订过的 AI 生成文本。

免责声明

我们的 AI 写作评估旨在帮助教育工作者识别可能由生成式 AI 工具准备的文本。我们的 AI 写作评估可能并不总是准确的（即我们的 AI 模型可能会产生误报），因此它不应被用作对学生采取惩罚措施的唯一依据。需要进一步审查和人工判断 并结合组织的具体学术政策应用 来确定是否存在学术不端行为。

常见问题解答

我该如何解读 Turnitin 的 AI 写作百分比和误报情况

AI 写作报告中所显示的百分比 是指提交内容的符合条件的文本中 经 Turnitin 的 AI 写作检测模型判定 可能是由大型语言模型生成的文本 或可能是使用 AI 改写工具或词语微调器修改过的 AI 生成文本的比例。

在 AI 模型中 可能会出现误报（即将人类撰写的文本错误地标记为 AI 生成的文本）的情况。

AI 检测分数低于 20% 时（不会在新报告中显示这些分数） 出现误报的可能性更高。为降低错误解读的可能性 报告中不会标注分数或高亮显示相关文本 而是用星号表示 (*%)。

AI 写作百分比不应作为判定是否存在不当行为的唯一依据。审阅者/教师应将该百分比作为与学生展开建设性对话的契机 和/或根据学校政策 用它来审查提交的作业。

“符合条件的文本”是什么意思

我们的模型仅处理长篇写作形式的符合条件的文本。长篇写作是指构成一篇较长书面作品（如论文、学位论文或文章等）的段落中所包含的单个句子。在提交的内容中 被判定为可能是 AI 生成的符合条件的文本将以青色高亮显示 可能是 AI 生成后又被 AI 改写的文本将以紫色高亮显示。

不符合条件的文本 如项目符号列表、注释性参考文献目录等 将不会被处理 这可能会导致提交内容中的高亮显示部分与所显示的百分比之间存在差异。

Personal Statement

In my case analysis project, “Research on the Innovation of Social Short Video Business Model under the Perspective of New Media Economy,” I studied how the TikTok platform integrates the creator ecosystem (UGC/PUGC) and delivers high-efficiency value through e-commerce channels. From the experience of this project, I found that marketing would be the most important driver of the innovation of business model. Specifically, problems I found, such as the problem of coordinated allocation of creator resources and difficulty of controlling content quality, inspired me to skip the macro-economy analysis, but focus on the important role of precise market positioning, refined content strategy, and efficient coordination of supply chain.

As a result of this experience, I shifted my academic interests from economics to marketing because of its cross-disciplinary and practical nature. Therefore, I am eager to pursue systematic study in Marketing at the graduate level. The MSc in Marketing program offered by City University of Hong Kong is an ideal choice.

My undergraduate education in economics has established a solid foundation for my further studies. During this time, I was exposed to multiple disciplines, including economics, management, marketing, international trade, etc. Through studying *The Principle of Management* (English), I gained insights into classic management theories, organizational behavior, and strategic decision-making methods, which enhanced my strategic thinking, teamwork, and cross-cultural communication skills. Studying *Regional Economics* (Bilingual) equipped me with knowledge of regional development theory, spatial economics, and industrial cluster analysis. I also developed the ability to assess the impact of regional economic factors on supply chain networks and learned to use GIS tools for location analysis. Additionally, the *Marketing* (Bilingual) course not only provided me with basic marketing strategies and brand management methods for the international market, but also taught me how to apply the core theories of marketing, such as the 4P theory, market segmentation, and consumer behavior analysis, to develop effective marketing campaigns.

I have also actively participated in practical projects. In the group research project on the global layout of SONY’s digital camera product line, where I was responsible for data collection and visualization analysis. Based on the theory of comparative advantage, I evaluated the rationality of its production layouts in Japan, China, and Thailand. Facing the challenges of incomplete data and the integration of policies from multiple countries, I mined publicly available data, combined case studies with theoretical models, and ultimately proposed a strategy for Sony to optimize global resource allocation through “outsourcing + localization.”

This experience not only enhanced my ability to analyze cross-cultural industrial chains and make data-driven decisions, but also sparked my interest in exploring how geopolitical economic factors can influence global supply chain management and marketing planning strategies.

My several internship experiences were equally rewarding. During my internship at Hikvision, I was mainly responsible for the full lifecycle cycle management of fixed assets, as well as providing support for HR digitalization projects and administrative operations. While conducting fixed asset inventories, I encountered challenges such as tag detachment and mismatched information. To address these issues, I innovatively proposed a “temporary coding-multi-party verification-system update” solution. This approach not only helped re-establish ledgers for over 200 assets but also recovered a high-value piece of equipment that had been forgotten and unused for years.

This experience familiarized me with asset management and administrative workflows and broadened my perspective on human resource management. Additionally, I came to understand the importance of precise management in back-office operations and how digital transformation improves operational efficiency in enterprise back-office operations.

I am committed to becoming a marketing professional who can design integrated marketing solutions that combine creativity and commercial value, empowering enterprises to achieve sustainable growth. After graduation, I plan to join an enterprise with an international business focus, specializing in marketing strategy, brand development, and market expansion across diverse global markets. As an economics graduate, I have mastered the theories for analyzing the macro market. Still, I lack the systematic knowledge to apply the theory to marketing, analytical and innovation practice. CityU’s Master of Science in Marketing program aligns perfectly with my goal of addressing this gap.

This program features a comprehensive curriculum, covering diverse topics of my interests. I am particularly interested in taking core modules like *Advanced Marketing Analytics* and *Marketing Innovation and Practicum*. Through these courses, I aim to transform my past macro-analysis capabilities in the market into data-driven strategic marketing planning skills that can drive business growth. Additionally, elective modules like *Brand Marketing* and *Digital Marketing* are also attractive. By enrolling in these course offerings, I aim to gain the necessary knowledge and skills to design and implement effective marketing strategies in both domestic and international markets. Moreover, I hope to gain experience that can be used to guide future marketing projects by participating in relevant case studies.

I also value the abundant industry resources available that CityU’s Department of Marketing has to offer. I am very much looking forward to joining company visits and industry seminars to gain meaningful insights as well as emerging industry trends. Furthermore, I desire to participate in an internship program during my studies to gain professional experience while refining my problem-solving skills.

I am confident that with the support of CityU, I will be well-equipped to succeed in this dynamic global business environment.
